SQL injection UNION attack, finding a column containing text

In Lab 03 we found that there are 3 columns and now we are going to find the column containing the text.

SQL injection UNION attack, finding a column containing text

[Back to lab home](#)

Make the database retrieve the string: '01SxDr'

[Back to lab description >>](#)

'+UNION+SELECT+NULL,'01SxDr',NULL—

Directly we cant search in second column , first we have to search in first column , if its displays as error then we need to move to next column.

In this the string we searching is in second column.

Lab: SQL injection UNION attack, finding a column containing text

LAB Solved

Congratulations, you solved the lab!
