

Server Site Request Forgery Lab-01

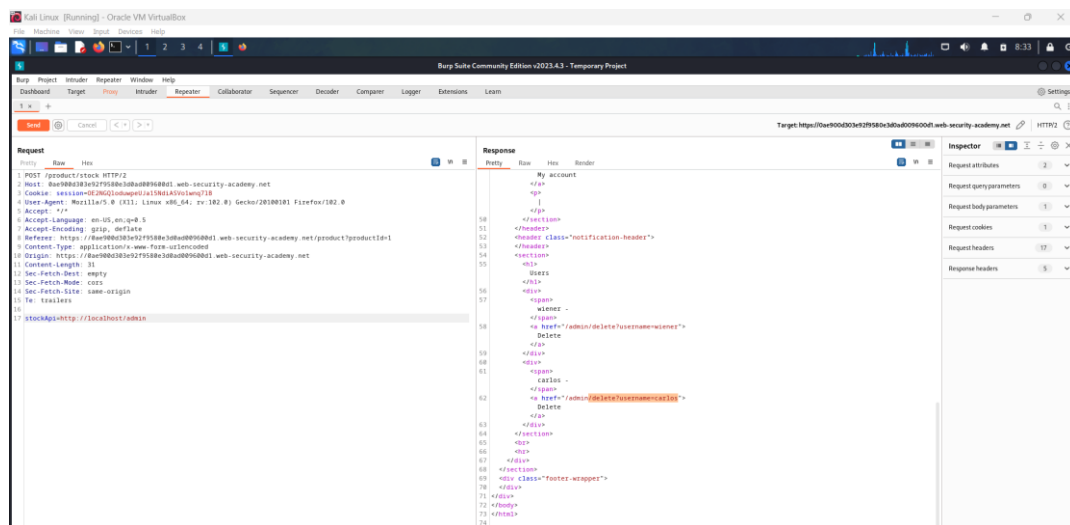

M.Gobi Shankar

CB.SC.P2CYS23019

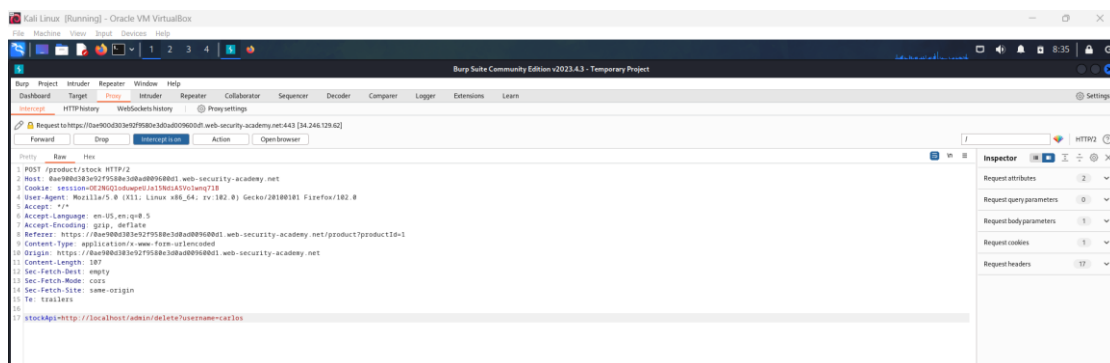

Basic SSRF Against The Local Server

In this lab we are going to access /admin panel indirectly through the stockAPI which is actually use to fetch the details of the product and we are going to manipulate it and access the /admin panel and delete an user called carlos.

stockApi=http://localhost/admin

http://localhost/admin/delete?username=carlos

Lab Completed Successfully.
